

Problems with generic or make-shift dividers.

Generic dividers will need to be cut or bent to fit around metal ribbing.

Slow and Difficult

The Ultimate Engineered Solution From Kuma

Kuma's universal mounting system is engineered to fit metal roofs without cutting!

Quick and Easy

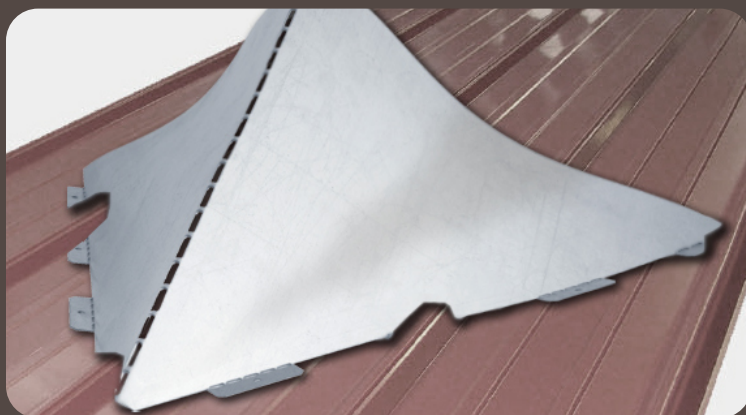

It is possible for snow and ice to "ramp" over some dividers and shear off the chimney.

Ruined Chimney

The Kuma divider installs at a right angle to the roof so that snow will either stop or be diverted.

A Well Protected Chimney

Dividers made of flat steel may not stand up to the pressure of snow and ice.

Crushed Snow Divider

Kuma Dividers are made of corrosion resistant steel with structural flanges for exceptional strength

Add the value of a Kuma Snow Destroyer to your next chimney or roofing installation

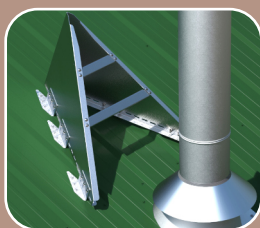

Everywhere it snows - Everybody knows chimney damage happens!
Don't let it happen to you.

**The right size snow divider
for your job!**

Standard
13" tall by 16" wide pro-
tection. Great for most
6" and 8" chimneys.

Extra Large
16" tall by 20" wide pro-
tection. Great for larger
chimneys or heavy snow
regions.

Optional Roof brace kit.
Works for 6" or 8" chim-
neys (8" or 10" OD). Pro-
tects the brace from slid-
ing snow.

Vents
Brace and protect
plumbing vents or any
smaller pipe
2" - 5" diameter

With a fully transferable lifetime warranty:

**The Kuma Snow Destroyer
adds big value to your next installation:**

- Available in stainless steel or galvanized steel.
- Fully adjustable. Installs on any metal roof without damag-
ing the ribbing.
- No need to pre-measure the job. Universal design for quick
on-site installation!
- Attach a roof brace directly to the snow destroyer with the
built-in support bracket attachment points.
- Ships in a slim box with all hardware and instructions.
